

## **The AZ Water Association is committed to:**

### **Career Advancement for Water Professionals**

By providing education, training, networking opportunities, and leadership programs to help water professionals advance their careers and build trust, inside and outside the industry.

### **Enhancing the Human Resources Available to the Industry**

By helping the industry recruit talent sufficient to meet its needs.

### **High Quality Water and Public Health**

By supporting the industry in ensuring that Arizona's water resources are consistently safe.

### **Future Water Certainty for Arizona Water Consumers**

By helping industry professionals ensure that people have highly reliable water resource and looking long-term, with an emphasis on sound resource and infrastructure planning.

### **Environmental Leadership**

By being advocates for protecting and enhancing Arizona's natural environment and advocating to ensure that there is enough water for Arizona

### **Increasing the Financial Resources Dedicated to Water and the Environment**

By being advocates for appropriate and continued investment in water resources, watersheds, water quality and water infrastructure. And, by providing resources and training designed to help water and wastewater utilities constantly increase their efficiency.

### **Public Outreach**

By encouraging networking and collaboration with related organizations, stakeholders, and in our communities and by helping the industry effectively communicate important water issues to the public.
